

Ensure Students Are Learning: Faculty Descriptions of Innovative Teaching Practices

Enhancing Lectures Through Online Study Materials

Innovative Teaching Practice Description:

The instructor creates a document with lecture notes and uploads it to the student online learning platform (e.g., Canvas). The instructor also creates a voiceover of the lecture notes and uploads it to the online learning platform so that students can read the notes and listen to the lecture simultaneously. The instructor asks students to listen to the lecture and to read the notes before coming to class. When students come to class, the instructor uses Kahoot!, an online quiz platform, to assess students' comprehension of the material presented in the lecture notes and voiceover. If many students do not correctly answer a question presented in Kahoot!, the instructor will take some class time to review the concept and the quiz answers.
